

How else can we use **RANC method**? There are different ways, you can apply it to treat your friends and relatives, to help suffering people, or you can use it for self-promotion. I got to know about it a few months ago and had no idea how to treat this. I regularly "go online", of course, I've invested a lot of mental and physical strength and I do not mention the material costs, so I "surf" in network to know, what people say. Suddenly about 2-3 months ago I noticed, that the method got "popularity" in a heap, the abbreviation «RANC» started to be used by people having no relation to this topic, only for their own selfish interests.

At first it seemed to me funny and then I got concerned about it, because webpages "dressed up" to **RANC method** filling the Internet space and having no relation to it discredit the idea. Fortunately, these "webpages" have a clearly distinctive features, for example, they have very distinctive and easily recognizable names, such as "RANC treatment method in Moscow SKHTOPOSKHEM. RU". If you go to the "page", you will find nothing, but Andrei Malakhov, Gazmanov and Dmitry Krylov. I hesitate, that these people participate in this project, it looks like somebody simply use their names to mislead the people, who are suffering and seeking to get rid of their suffering. Internet is full of these "pages". As soon as you open such site, you will easily distinguish it from the real one. I just do not pay attention to them as soon as I see a meaningless set of caps at the end of name of the "site". Of course, I feel flattered, that the proposed topic becomes increasingly popular and people start to "pick" on it, but you will agree, it is not, what I've dreamed about. I will not mention the name of the "author" of this project; he names himself on his "pages". Let's leave it to heaven. I do not take these texts from my head, people write me them. If interested, you can type in Yandex search system "New is well forgotten old. RANC ». I do not know Alexander personally, we just talked on phone 2-3 times.

I understand people trying to help their fellows. I understand doctors from Krasnoyarsk Clinic "Axon +" and "Drug-free treatment clinic," I understand Gennady Berdyugin from Angarsk, who trained three doctors in Angarsk, one in Ekibastuz and one in San Francisco. It is clear to me, but I do not understand tricks. Why?

I looks like we were right creating “**RANC association**” to reduce mischief and fraud.

**Andrei Ponomarenko**
